

Pressure Precision

with front-flush diaphragm
for gauge pressure and absolute pressure

accuracy 0.05% and 0.1 % of Full scale value

- standard output:**
- 4...20 mA; 2-wire system,
 - or 4...20 mA; 3-wire system,
 - or 0...20 mA; 3-wire system,
 - or 0... 5 VDC; 3-wire system,
 - or 0 ...10 VDC; 3-wire system

P3290

P3291

Description

Pressure sensors precisions are top of the range precision pressure sensors.

With a standard accuracy of 0.1% and optional accuracy of 0.05%, these pressure sensors are particularly suitable for use in testing or calibration systems. The program - controlled temperature compensation system practically eliminates temperature - related measurement errors in the range 10°C to 60°C.

The front flush pressure diaphragm avoids zones, in which medium could crystallize or residues could form, thus ensuring trouble-free pressure measurement and hygenic cleaning of the pressure sensor.

Their long-term stability, good corrosion resistance, high protection up to max. IP 67 and mechanical load rating are the basis for use in harsh industrial environments.

For special measuring jobs, the zero point and measuring range can be reset with an IBM compatible PC. The software for the collection, storage and output of the measured values is available as an additional option.

The pressure sensors precisions meet the electromagnetic compatibility (EMC) to EN 61326.

Features

- High accuracy
- Long-term stability
- Thermally compensated for 10°C to 60°C. temperature range
- Corrosion resistant stainless steel design
- With laser welded front-flush diaphragm
- Serial interface, USB – interface at PC
- Fast external measurement value processing for data collection to 1kHz (3-wire)
- Compact design

Measuring ranges

Gauge pressure

negativ	-1...0 bar	to	-0,25...0 bar
---------	------------	----	---------------

positiv	0...0,25 bar	to	0...1000 bar
---------	--------------	----	--------------

absolute pressure	0...0,25 bar	to	0...16 bar
-------------------	--------------	----	------------

Applications

Testing and calibration systems,
Engineering,
Development and production

Models: P3290, P3291

Technical data

Model	P3290							P3291				Options						
Pressure type	negative or positive gauge pressure		absolute pressure		negative or positive gauge pressure		absolute pressure		negative or positive gauge pressure									
Output signal	4 ... 20 mA - 2-wire		0...5 VDC - 3-wire		4 ... 20 mA - 3-wire		0...10 VDC - 3-wire											
Accuracy ¹⁾	$\leq 0,1\%$ of F.S. in the range of 0...50°											< 0,05 % of F.S. to 20°C ²⁾						
Ranges	bar	0,25	0,4	0,6	1	1,6	2,5	4	6	10	16	1600 bar on request						
Overload limit	bar	2	2	4	5	10	10	17	35	35	80							
Burst pressure	bar	2,4	2,4	4,8	6	12	12	20,5	42	42	96							
Ranges	bar	25	40	60	100	160	250	400	600	1000 ³⁾								
Overload limit	bar	50	80	120	200	320	500	800	1200	1500								
Burst pressure	bar	96	400	550	800	1000	1200	1700 ⁴⁾	2400 ³⁾	3000								
Sensor element	Piezoresistive: Vacuum: -1 ... 16 bar Relative pressure: 0 ... 0,25 bar to 25 bar Thin film: Relative pressure: 25,01 ... 1000 bar																	
Overload limit	≤ 16 bar 3,5 x; ≤ 600 bar 2 x;					≤ 16 bar 3,5 x; ≤ 600 bar 2 x												
Repeatability	$\leq \pm 0,03\%$ of F.S.																	
Stability (annual)	$\leq \pm 0,1\%$ of F.S.. in rated conditions																	
Case	Stainless steel 1.4571																	
Internal liquid transmission	Synthetic oil {halocarbon-oil for oxygen-construction} Attention: not by ranges: > 25 bar					Synthetic oil {halocarbon-oil for oxygen-construction}												
Process connection	G 1/2 B acc. to EN 837					to 1,6 bar G 1 B front plug; from 2,5 bar G 1/2 B front plug						G1/4B; 1/2NPT; 1/4NPT; G1 B and G1/2 B front plug						
Wetted parts	Stainless steel, 1.4571 (to range: > 25 bar aditionally 2.4711 / UNSR 30003)					Stainless steel, 1.4571; o-ring: NBR {FPM/FKM or EPDM}												
Electr. connection – Analogue output	M12x1											DIN EN 175301-803 Form A Cable output with 1,5 m cable, Bajonet-connector						
Power supply – Analogue output	14...30 VDC by outlet signal 0-10 VDC 9...30 VDC by all other outlet-signals																	
Power consumption	max 30 mA with current output / < 25 mA with voltage output																	
Load	– current output (2-L) – current output (3-L) – 0...5 V (3-L) – 0...10 V (3-L)																	
Temperature influence – Midle TK of zero – Midle TK of span	RA[Ω] $\leq (UB[V] - 10V) / 0,02$ A RA[Ω] $\leq (UB[V] - 10V) / 0,02$ A > 5 kOhm > 10 kOhm																	
Adjustability – zero point – span – measured value – heating period – Isolation span	of zero and span; programmable -5...+20% {adjustment by software EasyCom} -20...+ 5% {adjustment by software EasyCom} 4 ms by construction 2-wire; 1 ms by construction 3-wire < 10 min 500 VDC																	
Measured value	3-wire 1ms (1kHz) and 2-wire 3ms (0,33 kHz)																	
Protection	IP 67 acc. to EN 60 529 / IEC 529											IP 65 (L-plug)						
Emission ⁵⁾	acc. to EN 61326																	
Interference ⁵⁾	acc. to EN 61326																	
Temperature ranges – Storage – Medium – Ambient	-40 85 °C -20 105 °C In oxygen-construction, model P3291 is unavailable. In oxygen-construction, model P3290 is only possible with medium: -20 ... +60 °C. -20 80 °C																	
Compensated temperature range	-20 80 °C																	
Weight	ca. 0,30 kg																	

¹⁾ Inclusive of nonlinearity, hysteresis, zero-point- and full scale value deviation

of F.S. = of full scale value

(conform to measuring deviation acc. to IEC 61298-2) - (calibrated in vertical installation position, pressure connection bottom)

²⁾ Not possible by: \pm - measuring ranges and measuring ranges $\leq 0,4$ bar.

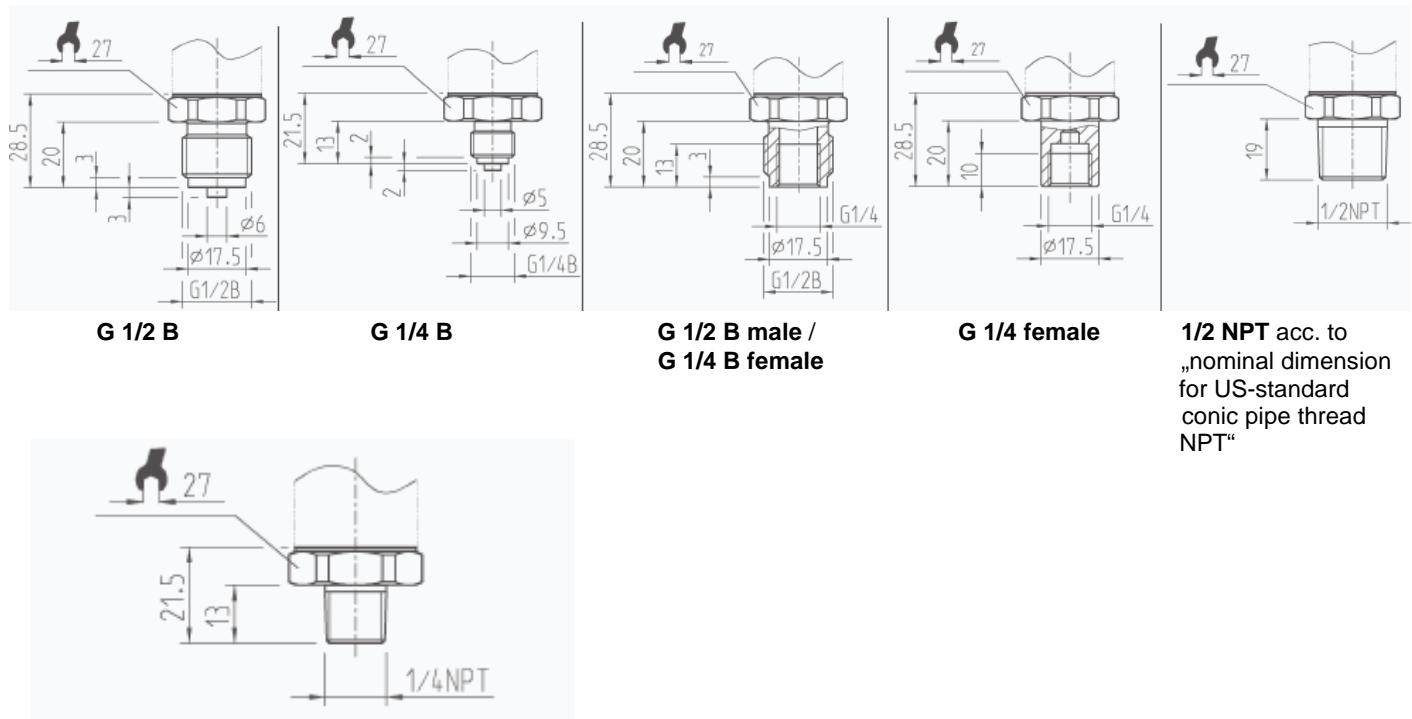

³⁾ Only for model P3290 available

⁴⁾ Model P3291: the tabular value is only available by o-ring seal under the hexagon. Otherwise is available max. 1500 bar.

⁵⁾ Declaration of conformity on request.

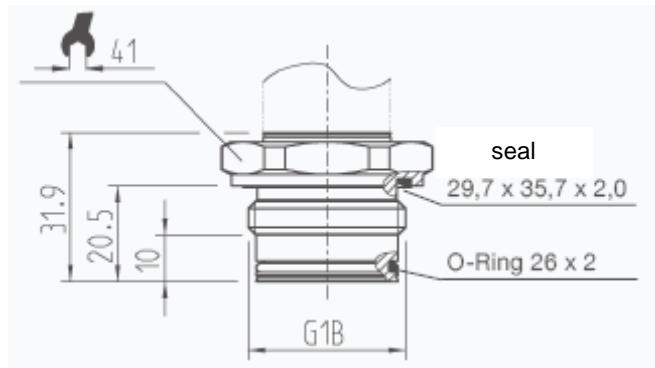

Dimensions (mm)

Pressure connections for model P3290

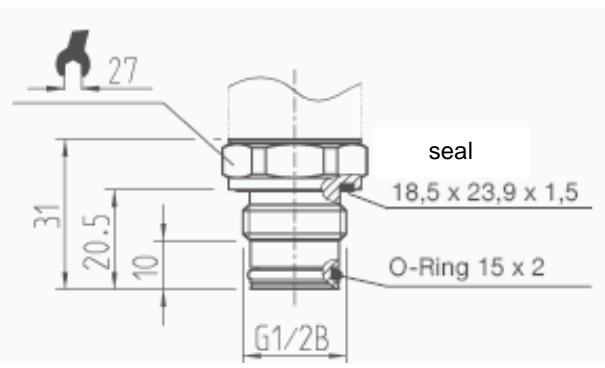

1/4 NPT acc. to „nominal dimension for US-standard conic pipe thread NPT“

Pressure connection for model P3291, front flush

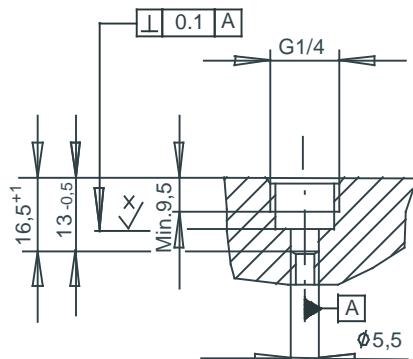

G 1B 0 ... 0,25 bar to 0 ... 1,6 bar

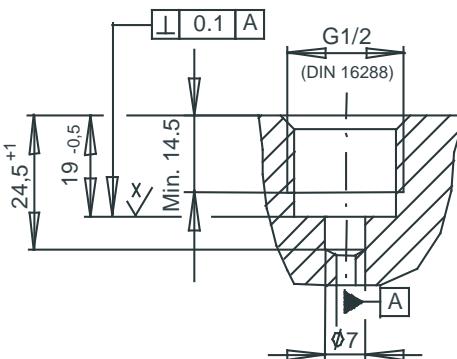

G 1/2B 0 ... 2,5 bar to 0 ... 1000 bar

Tapped holes acc. to DIN 16288
